Project Code: DART0049\_W7  
Project Name: Bright Line Watch Wave 7  
Prepared for: Brendan Nyhan  
Interviews: 2750  
Field Period: September 25, 2024 – October 07, 2024  
Project Manager: Caitlin Collins, [caitlin.collins@yougov.com](mailto:caitlin.collins@yougov.com)  
=====

YouGov interviewed 2905 respondents in the main sample, who were then matched down to a sample of 2452. The matched main sample was then combined with an oversample of 298 Republicans in order to produce the final dataset of 2750 cases. The respondents were matched to a sampling frame on gender, age, race, and education. The sampling frame is a politically representative "modeled frame" of US adults, based upon the American Community Survey (ACS) public use microdata file, public voter file records, the 2020 Current Population Survey (CPS) Voting and Registration supplements, the 2020 National Election Pool (NEP) exit poll, and the 2020 CES surveys, including demographics and 2020 presidential vote.

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, years of education, region, and home ownership. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles.

The weights were then post-stratified on 2020 presidential vote choice as well as a four-way stratification of gender, age (4-categories), race (4-categories), and education (4-categories), to produce the final weight.
